Introduction

In the last decade, much attention on vocational education program improvement has been directed by way of multi-state consortia. A consortium is defined here to mean two or more states or state-level agencies joined for the purpose of developing and sharing vocational educational program improvement resources. The focus may be curriculum development, professional development, or a combination of emphases.

Because of the high level of consortia formation and a confusion over the focus, costs, and obligations of membership in consortia, a committee of the East Central Region of the National Network for Curriculum Coordination in Vocational and Technical Education (NNCCVTE) was formed to examine issues of concern regarding consortiums. The committee members were:

Rosemary Bengel, Maryland
Rebecca Douglass, East Central Network, Illinois
Joyce Keefer Leimbach, Ohio
Vernon Register, Chairperson, Pennsylvania
Ned Swartz, Virginia

This directory is the result of the initiatives of the Consortia Studies Committee. It is made up of 16 single sheet profiles of each consortium followed by several tables which consolidate information from all consortia on the topics of Consortia Features, Method of Occupational Analysis, Consortia Membership Rosters, and Consortium Staff.

It is hoped that the directory will be a valuable resource to federal, state and local vocational educators interested in joining or accessing services and materials provided through consortial arrangements. The directory is not exhaustive of all vocational consortia, and we welcome any new additions sent to us for the next edition of the directory.

Thanks and appreciation are extended to Jo Egger of the East Central Network for her assistance in compiling and verifying the data.

Copies have been shared with the ERIC Clearinghouse, the National Center for Research in Vocational Education, the United States Department of Education and State Departments of Education.

ORGANIZATIONAL STRUCTURE: Centralized

PHILOSOPHY: To serve as the focal point in response to state, institution, and local agencies for articulating activities in occupational competency testing as a not-for-profit corporation; to provide "industry driven" occupational competency testing materials and services, on a fee basis, to the various states and teacher education institutions in preparing occupationally competent persons for teaching, supervisory, administrative, or other leadership positions; to approve educational, military, industrial, labor or other organizations or agencies to measure occupational competence; to vocational education accrediting agencies; to public or private vocational education programs or systems to measure student achievement in an occupation.

OBLIGATIONS OF MEMBERSHIP: Consortium representatives are appointed by the State Directors of Vocational Education. Representatives from voting member states may vote at the annual meeting held each December at the American Vocational Association Convention. These consortium members approve the NOCTI budget for the upcoming fiscal year and authorize the Executive Director to develop the program and expend monies at a level consistent with income. They also promote teacher, student, and industrial testing activities to insure the quality of vocational education in their state and throughout the United States. Nonvoting and honorary memberships are also available.

BENEFITS OF MEMBERSHIP: Availability of NOCTI testing services for certification of prospective and current teachers in each state, for evaluation of achievement of secondary and postsecondary students and adults in occupational education, and for assessment of employees in business and industry.
